For Crop Week Ending Sunday, April 13, 2008

Released April 14, 2008

Volume 08 Number 06

## CROP INFORMATION

**Days suitable for fieldwork:** 5.5  
**Soil moisture supplies:** 1% very short, 14% short, 71% adequate and 14% surplus

**Field Crops Report**  
Moisture from previous week’s rainfall was starting to dry out fields permitting field activities to resume. Although rice planting remained active, strong winds kept producers from making much progress in planting. Cane field work progressed well with cultivation and spraying in full swing. Soybean and sorghum planting were underway.

**Fruits, Vegetables and Specialty Crops**  
Vegetable producers were harvesting their crops. Citrus producers scouted for insects. Crawfish producers continued harvesting. Some ponds were drained because of low prices.

**Livestock, Pasture and Range Report**  
Some fertilizer was applied to pastures. Cattlemen remained busy as calving season continued. Some farmers made a first cutting of hay.
